SUPERVISORY PATENT EXAMINER

***Allowable Subject Matter***

Claims 1, 2, 3, 6, 8, 10, 13, 18, 21, 22, 23, 25, 26, 32, 34, 35, 38, 43, 44, and 46 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant states in the remarks filed 4/10/06 "As stated earlier, the present invention is directed to a method and apparatus of reducing the overhead of the wireless link, by elimination on one side of the wireless link of protocol headers from the wireless link. Applicant achieve this by operating in the socket abstraction layer and removing socket information contained in that layer. An agent communication device, such as in infrastructure device, receives a message in the socket abstraction layer containing destination information for the message but not containing information identifying the client communication device, such as a mobile subscriber, which originates the message... This information is not replace by any other information and therefore reduces the size of the packet and operates in the socket abstraction layer." (pages 9-10 of remarks filed 4/10/06) This differentiates over the prior art in that necessary information (destination information) is not well known in the art to be removed from packet information at the point of the socket layer.

Additionally applicant further clarifies interpretation of the claim, "Regardless of the lexicon used in the claim, the present invention is directed to the operation of the agent communication device ... a connection with a destination and the destination." (page 11 of remarks filed 4/10/06) Applicant specific interpretation of the present claim

differentiate over the prior in requiring the specifics of operation in the socket abstraction layer, connection on the client communication in addition the established connection is a virtual connect. Therefore based upon these and other features presented in the claims, arguments present in the remarks filed 4/10/06, the present invention differentiates over the prior art..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
